ABOUT

PROFILE

A mechanical engineer equips with knowledge of metal testing, surface wellhead design, pipe connector design, and simulation.

PERSONAL PARTICULAR

Date of Birth : 22 March 1994
Nationality : Malaysian
Race : Chinese
Gender : Male
Marital Status : Not married
NRIC (PR) : S9485057F

[Personal Portfolio Website](#)

Educational Background

Bachelor's Degree in Mechanical Engineering (2018)

Institution: Curtin University

Grade: Second Upper Class Honours

Project (Degree Thesis)

CFD Study in Heat Transfer Enhancement of Heat Exchanger

- Studied the impact of overall heat transfer enhancement of a compact heat exchange by employing different fin designs and introducing vortex generators.

Technical Skills

- AutoCAD
- Solidworks
- GD&T
- Abaqus
- Metal Testing
- Python

Professional Experience

Assistant QA Engineer

GP Manufacturing Pte Ltd | 3rd Sep 2018 – 23rd Nov 2018

- Generate first article inspection reports by translating from engineering drawings and identify the critical dimensions.
- Managed and approved quality reports.
- Established quality, work, and operation instructions.

Test Coordination Engineer

Professional Testing Services Pte Ltd | 4th Nov 2019 – 29th Feb 2024

- Oversee the entire testing process from preparation to report generation and ensure smooth transition between each process.
- In a cross-department environment, discuss and rectify issues arise during the testing process.
- When required, handle and advise clients on their respective test requirements.

Product Design Engineer

OMS Oilfield Services Pte Ltd | 4th Mar 2024 – Present

- Generate product drawings in both pipe connectors and surface wellhead equipment (API 6A).
- Perform tolerance stack up analysis, engineering calculations, and simulations.
- As a part of 3D printing (FDM) team, design, print, and study smaller components.
